

Maritime Port Security

Zel Technologies, LLC (ZelTech), has a proven record of developing and implementing risk-based security strategies for Maritime Transportation Security Act (MTSA) compliance.

Our enterprise approach “operationalizes” security by integrating it into business operations and business strategy.

We help you exploit low cost improvements to business processes that reduce vulnerabilities, risks, and costs, while increasing productivity and competitiveness.

We leverage your existing infrastructure, help you select and integrate best-of-breed technologies, and plan system life cycle management that ensures the best return on your security investment.

Continuity of Operations is crucial. We develop Concepts of Operations to maximize security resources and offer advanced capabilities in Data Visualization that provides innovative solutions for Command Center integration, data sharing and interoperability, interagency coordination, and enterprise management.

Regional Security Collaboration

Zel Technologies, LLC (ZelTech), has proven success at designing and managing the installation of regional networks for sharing emergency data and enhancing communications interoperability.

We have developed a survivable microwave network that connects first responders, 16 Emergency Operations Centers, public broadcasting stations, Ports, State Police, and the US Coast Guard.

We offer a full range of security management services. This includes development of effective concepts of operations supported by exercises and training to ensure readiness at all levels of your organization. We provide the expertise of a dedicated program manager who is instantly responsive and always available to meet your security needs.

The unique mix of experience and expertise provides ZelTech clear insight into the solutions required for effective Security, Operations, and Enterprise Management that we will leverage in our support to you.
