

OUR TRAINING

We create and provide customized ISR training solutions, both classified and unclassified, to meet your organizational goals, from assisting in the establishment of new ISR employment, tactical control and exploitation competences to enhancing current capabilities.

We audit existing programs and provide consultation of tradecraft and technology that will optimize the efficiency of current ISR tasking, collection and exploitation procedures.

We produce and deliver formal classroom instruction, scenario-based training and comprehensive exercises that expose customers to real-world ISR applications, enhancing your organizations ISR mission readiness, training, and qualification.

Training may be scheduled at our Shalimar, FL training facility or delivered through a Mobile Training Team to your location.

OUR GOAL

Is to be a valued mission partner by providing relevant ISR employment, tactical control and Processing Exploitation and Dissemination (PED) subject matter expertise, training and advisement in support of US national interests.

OUR PROMISE

The ZelTech ISR Ops Training Institute guarantees instruction that is:

RELEVANT

Our training is based on current, real-world ISR operational experience, verified best practices, lessons learned and proven TTPs--leveraging our continuous support to SOF experience ensures we are relevant and read-in to the latest in ISR operations.

TAILORED

Our subject matter experts develop TTPs and training that meet your specific mission requirements and the joint standards sustainable within your available resources.

SCALABLE

we can build and deliver programs of instruction and evaluation from beginner and executive level training to advanced curriculum, including train the trainer courses, that meet your desired proficiency level and student throughput requirements.

PROVEN

We continue to perform ISR collection, ISR PED operations and formalized ISR PED and ITC instruction for United States Special Operations Command (USSOCOM).

FORWARD LOOKING

We advise on leading edge ISR sensors, PED technologies and TTPs that improve mission efficiencies and proactively prepares customers for the tomorrow's ISR operations demands.

MODULAR TRAINING MODEL

We offer a robust menu of ISR training modules that may be combined to create tailored training packages for our customers.

This approach has been proven to provide the greatest flexibility of course structure to address each customer's specific needs.

Our ISR Instructor SMEs are also capable of creating new modules of instruction to improve organization-centric capabilities.

SAMPLE TRAINING MODULES

- SOF Targeting Methodology
- Advanced FMV Analysis
- Pattern of Life Analysis
- GIS & Cursor On Target Tools & Products
- FMV Exploitation Tools & Systems
- ISR Tactical Controller Operations
- Mission Intelligence Coordinator Operations
- Multi-INT Intelligence Fusion
- ISR Collections and PED Management
- ISR Platform and Sensor Capabilities
- ISR Communication Systems Training
- Tactical ISR Aircrew & Supported Unit Roles & Responsibilities
- Contingency Operations Support
- Close Air Support (CAS) Collaboration
- Collateral Damage Estimates and Battle Damage Assessments

CERTIFICATION COURSES

Our pre-formulated ISR certification courses offer regimented training solutions that combine detailed lessons, relevant practical exercise, and evaluated milestones to give students the tools they need to succeed in the high-demand ISR operational environment.

- Basic and Advanced Full-Motion Video Exploitation & Analysis
- Basic and Advanced ISR Tactical Employment & Sensor Management
- Basic and Advanced GEOINT Support to Military Operations
- Basic and Advanced Multi-Source Analysis and Intelligence Fusion
- Executive Intelligence, Surveillance, and Reconnaissance Seminar

EXERCISE & SCENARIO SUPPORT

Supporting customers execute realistic exercise and scenario training in our secure training facility.

- Role Players (PED, ITC, JTAC, J2, GFC, Collection Manager, ISR Aircrew)
- Scenario Scripting Services

TRAINING FOR TOMORROW, TODAY
